## Homeostasis

Anatomy and Physiology  
2017-2018

Unit 1: Intro to Anatomy

Name: \_\_\_\_\_

What is homeostasis?

What is disease?

Model of homeostasis mechanisms in the body:

Positive Feedback Loop

Negative Feedback Loop

<p><b>Stimulus</b> low oxygen in body</p>	<p>Draw a model of how homeostasis is restored:</p> <p>Positive or Negative Feedback Loop? What restores homeostasis?</p>
<p><b>Stimulus</b> body temp is too low</p>	<p>Draw a model of how homeostasis is restored:</p> <p>Positive or Negative Feedback Loop? What restores homeostasis?</p>
<p><b>Stimulus</b> baby stimulating cervix</p>	<p>Draw a model of how homeostasis is restored:</p> <p>Positive or Negative Feedback Loop? What restores homeostasis?</p>
<p><b>Stimulus</b> deep cut in skin</p>	<p>Draw a model of how homeostasis is restored:</p> <p>Positive or Negative Feedback Loop? What restores homeostasis?</p>
